

Bring Interiors To **Life** With Digital Light Surface

Sun-Light Solutions

Digital Light Surface

We understand that every space demands a unique atmosphere and realise that many spaces are truly uninspiring. Which is why we deliver the Digital Light Surface. The new medium for creating digital light artwork in any environment.

Bring interiors to life with engaging digital light scenes by selecting one of the inbuilt colour scenes via an iPad, smartphone, PC, wall switch or trigger scenes interactively by using a motion sensor.

The translucent fabric placed in front of the intelligent RGB LED's provides a perfectly diffused light source. Offering static colours or colour motion with fluid transitions of any colour imaginable.

Digital Light Surface creates atmosphere wherever it is placed.
