

# Yeastar Workplace

## Workplace scheduling

solution for modern offices  
and the future of work

As today's workforce gets more collaborative, how to allocate office spaces has become increasingly significant in ensuring employee experience and productivity, especially for businesses that operate in a hybrid working environment or a co-working space.

Lacking a centralized workplace management system, organizational chaos and the waste of resources are a daily occurrence. Take meeting spaces for example. Room by room search, stolen rooms, interrupted meetings, ghost meetings, tedious tasks, and back-and-forth communication. All those and more are creating huge headaches for employees and administrators alike.

## All-in-one Management for the New Modern Workplace

Designed to take the stress away from workplace management, Yeastar Workplace incorporates a cloud-based platform, touch screen room displays, and smart sensors to deliver an interactive one-stop workspace scheduling solution for modern offices and the future of work. Ultimately, it will evolve into an all-inclusive system supporting integrated management of meeting rooms, desks and visitors.

As an integral part of the complete Workplace solution, Yeastar's meeting room booking system enables users to schedule room resources effortlessly, avoid reservation congestions, save time on administrative work, and make the most of meeting spaces.

## Efficient & intuitive online booking

See all meeting rooms and reservations in one place through a grid view. Pick a time that fits your schedule and simply click to book an available room. Add other attendees and they will be notified via email.

## Ideal rooms for different needs

Effortlessly find a suitable, well-equipped meeting room for various needs. Filter search rooms based on location, seating capacity, amenities, i.e. whiteboard, audio visual systems, projector, screen, etc.

## At-a-glance status & ad hoc booking

Instantly tell room availability status through room display's distinguishable 3-color LED light even from a distance. View the available time slots and tap the touch screen to book for an ad hoc meeting directly.

## Check-in & auto-release

Require employees to check in for their bookings to secure rooms, either through touch screens or through notifications, or else the space will be freed up. No-show meetings will be a thing of the past.

## Increased utilization & more insights

With smart sensors continuously detecting room occupancy, abandoned and early-ended meetings will be automatically freed up. The people counting sensors can provide further granularity for how the space is used.

## Outlook & Google Calendar integration

Book rooms directly from your calendar system. No more switching back & forth, you can create events, search for rooms, and make a reservation in seconds. Meeting schedules & changes will be synced both ways.

## In-depth workplace analytics

Gain actionable insights on how your meeting space is used, such as total meetings, recaptured hours, room utilization rate, meeting type, etc. Quickly respond to changes in headcount and predict future demands.

## Notifications for different events

Never miss a meeting again. Set up email notifications for different events, from booking confirmations, changes, cancellations, to check-in reminders, to keep everyone properly informed.

# Meeting Room Display Specifications

## Specifications

- Touch Screen: 10.1"LCD IPS touch screen
- Resolution: 1280 x 800
- Active Area: 216.96(L) x 135.6 mm(H)
- Aspect Ratio: 16:10
- 3-color Side LED Indicators
- Network
- Wi-Fi: 802.11b/g/n
- Ethernet: 100M/1000M ethernet
- Bluetooth: Bluetooth 4.0
- Operating System: Android 8.1
- Power over Ethernet (PoE) or DC 12V/1.5A
- Size: 249.36(L) x 168.36(H) x 24(D) mm
- Weight: 1.68 kg
- Mount: side mount and wall mount
- Operating Temperature: 0°C to +40°C
